- Traffic concerns
- Non-compliance with WorkSafeBC regulations
- Operational effectiveness problems

Current Fire Station Analysis

- Importance of Current Fire Station Performance
- Service level adjustments should aim to improve performance
- Response Times and Positioning
- Volunteer Firefighter Staffing Model
- Response Time Standards
- Fire Underwriters Survey Policy

Siting Considerations

+ Site Selection Challenges

Floodplain exposures

Access limitations

Agricultural land reserve

Community Engagement Plan

Priority for RDOS and Village

The Fire Department and governing agencies know the need, but the community may not.

Clear identification of drivers for replacement

Community Information Process

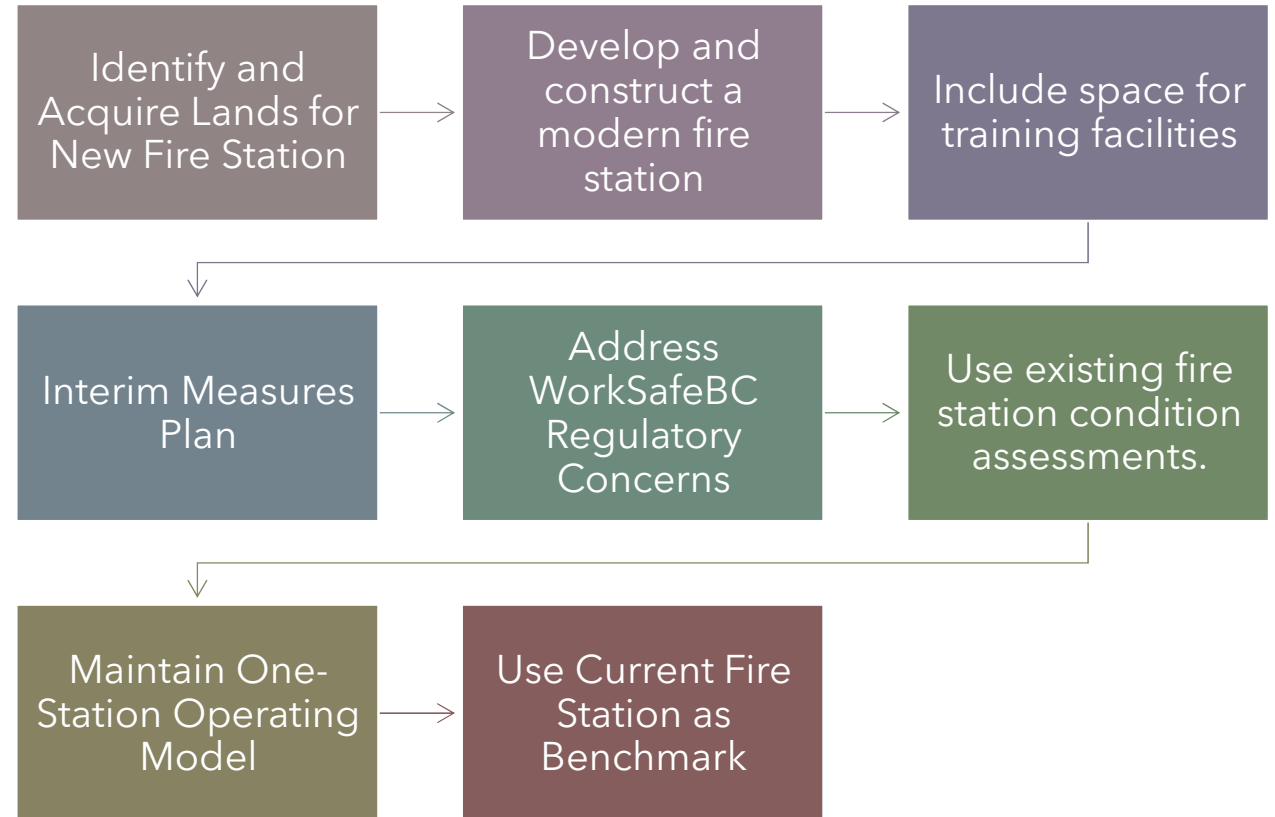

Rationale for a new site

Understanding key drivers for facility inclusions

Benefits for the communities served

Avoid Financial Estimates Early On

Recommendations Overview
