Missezula Lake Water System Upgrade

May 2026

Keeping the Community Informed

Information Newsletter

The Regional District of Okanagan-Similkameen (RDOS) owns and operates the Missezula Lake Water System (MLWS). The water system draws water from Missezula Lake and services approximately 190 residential and seasonal lots.

The main objectives of the Missezula Lake Water System Upgrade Project are to increase access and reliability of the available water source and to meet drinking water regulatory requirements for the Missezula Lake community.

Based on completed work by a consultant who assessed the possibility of using a ground water well instead of the lake surface water, the RDOS is maintaining the use of surface water as the source.

Activities since last report:

- Explored various water filtrations/treatment systems with a qualified professional/consultant
- Assembled treatment equipment on-site
- A utility trailer was located next to the chlorine shed adjacent to the existing pumphouse, chlorine shed and reservoir area
- Piloted and assessed effectiveness of selected filtration/treatment systems for eight (8) weeks
- Assessed the results and determined effectiveness of piloted treatment systems

Regional District of Okanagan-Similkameen Missezula Lake Water System Upgrade

May 2026

Keeping the Community Informed

- Treated water samples, along with capital and operating costs, are guiding the design of the Missezula community's water treatment system.

Next steps

- Finalize filtration/treatment design
- Develop and release RFP to supply, install and commission new system
